

4th Grade Weekly Update

In the PLAN today, you will find your child's friendly letter if they did not have the address of the person to which they wrote. They are hoping to mail these. The letters are very sweet. The relative or friend they wrote would enjoy reading them.

On Tuesday, we will have our first Science test. The children will be given an outline of a plant cell and an animal cell. They will need to label the parts of each cell and know what the function of each part is. They will also have 10 fill-in the blank questions from Chapter 1. Tonight they have the opportunity to put their Science Notebook together. We asked the children to bring all of their Science papers home. They have a cover sheet. All they need to do is put these papers **in order** with the cover sheet on top, staple together, and turn in tomorrow.

Your child took their AR test on Friday and a Leveled Reader test on Tuesday. These count as a grade so they are highlighted on the AR report.

We have included in the PLAN an order form for Highlights. They give us over \$30 worth of stickers if we provide these forms to our parents. It does not matter if they are ordered or not. We simply need your signature and the box checked "no" if you aren't interested in purchasing. Thank you!!
