

Facebook's Privacy Policy

Applications/Websites

4. Information You Share With Third Parties.

Facebook Platform. As mentioned above, we do not own or operate the applications or websites that use Facebook Platform. That means that when you use those applications and websites you are making your Facebook information available to someone other than Facebook. Prior to allowing them to access any information about you, we require them to agree to terms that limit their use of your information (which you can read about in Section 9 of our [Statement of Rights and Responsibilities](#)) and we use technical measures to ensure that they only obtain authorized information. To learn more about Platform, visit our [About Platform](#) page.

Connecting with an Application or Website. When you connect with an application or website it will have access to General Information about you. The term General Information includes your and your friends' names, profile pictures, gender, user IDs, connections, and any content shared using the Everyone privacy setting. We may also make information about the location of your computer or access device and your age available to applications and websites in order to help them implement appropriate security measures and control the distribution of age-appropriate content. If the application or website wants to access any other data, it will have to ask for your permission.

We give you tools to control how your information is shared with applications and websites that use Platform. For example, you can block all platform applications and websites completely or block specific applications from accessing your information by visiting your Applications and Websites [privacy setting](#) or the specific application's "About" page. You can also use your [privacy settings](#) to limit which of your information is available to "everyone".

You should always review the policies of third party applications and websites to make sure you are comfortable with the ways in which they use information you share with them. We do not guarantee that they will follow our rules. If you find an application or website that violates our rules, you should report the violation to us on this [help page](#) and we will take action as necessary.

When your friends use Platform. If your friend connects with an application or website, it will be able to access your name, profile picture, gender, user ID, and information you have shared with "everyone." It will also be able to access your connections, except it will not be able to access your friend list. If you have already connected with (or have a separate account with) that website or application, it may also be able to connect you with your friend on that application or website. If the application or website wants to access any of your other content or information (including your friend list), it will have to obtain specific permission from your friend. If your friend grants specific permission to the application or website, it will generally only be able to access content and information about you that your friend can access. In addition, it will only be allowed to use that content and information in connection with that friend. For example, if a friend gives an application access to a photo you only shared with your friends, that application could allow your friend to view or print the photo, but it cannot show that photo to anyone else.

We provide you with a number of tools to control how your information is shared when your friend connects with an application or website. For example, you can use your Application and Websites [privacy setting](#) to limit some of the information your friends can make available to applications and websites. You can block all platform applications and websites completely or block particular applications or websites from accessing your information. You can use your [privacy settings](#) to limit which friends can access your information, or limit which of your information is available to "everyone." You can also disconnect from a friend if you are uncomfortable with how they are using your information.

Pre-Approved Third-Party Websites and Applications. In order to provide you with useful social experiences off of Facebook, we occasionally need to provide General Information about you to pre-approved third party websites and applications that use Platform at the time you visit them (if you are still logged in to Facebook). Similarly, when one of your friends visits a pre-approved website or application, it will receive General Information about you so you and your friend can be connected on that website as well (if you also have an account with that website). In these cases we require these websites and applications to go through an approval process, and to enter into separate agreements designed to protect your privacy. For example, these agreements include provisions relating to the access and deletion of your General Information, along with your ability to opt-out of the experience being offered. You can disable instant personalization on all pre-approved websites and applications using your Applications and Websites [privacy setting](#). You can also block a particular pre-approved website or application by clicking "No Thanks" in the blue bar when you visit that application or

website. In addition, if you log out of Facebook before visiting a pre-approved application or website, it will not be able to access your information.

Exporting Information. You (and those you make your information available to) may use tools like RSS feeds, mobile phone address book applications, or copy and paste functions, to capture, export (and in some cases, import) information from Facebook, including your information and information about you. For example, if you share your phone number with your friends, they may use third party applications to sync that information with the address book on their mobile phone.

Advertisements. Sometimes the advertisers who present ads on Facebook use technological methods to measure the effectiveness of their ads and to personalize advertising content. You may opt-out of the placement of cookies by many of these advertisers [here](#). You may also use your browser cookie settings to limit or prevent the placement of cookies by advertising networks. Facebook does not share personally identifiable information with advertisers unless we get your permission.

Links. When you click on links on Facebook you may leave our site. We are not responsible for the privacy practices of other sites, and we encourage you to read their privacy statements.
